Interim Group Management Report

Information on the Group

Brockhaus Technologies' business activities consist firstly of its Security Technologies segment, and secondly of Central Functions, which focuses on identifying, investigating and acquiring subsidiaries and supporting their long-term growth (continuing operations). The Security Technologies segment is active in the field of security technologies, in particular for high-security data transmission in mission-critical applications.

The consolidated statement of comprehensive income and the consolidated statement of cash flows were adjusted for the comparative period because of the application of the requirements for discontinued operations under IFRS 5.32 onwards.

Unless specifically identified, the disclosures in this Half-Year Financial Report refer to continuing operations.

Sale of the Bikeleasing Group

On December 23, 2025, Brockhaus Technologies sold its entire interest in BLS Beteiligungs GmbH (Bikeleasing Group), held indirectly through BCM Erste Beteiligungs GmbH (BCM), to DECATHLON PULSE SAS (DECATHLON), a company of the French DECATHLON Group.

The sale closed on June 30, 2026. The shares and voting rights held by BCM were transferred to DECATHLON at the time of closing. Since that time, Brockhaus Technologies has no longer exercised control over the Bikeleasing Group within the meaning of IFRS 10. The Bikeleasing Group was therefore deconsolidated as of the closing date.

The preliminary purchase price paid on June 30, 2026, remains subject to the purchase price adjustment mechanism agreed in the sale agreement (closing accounts concept), especially with regard to the contractually defined financial liabilities and the Bikeleasing Group's net working capital.

The Group recognized the consideration received from the sale on the basis of the information available as of the reporting date and the best estimate of the final purchase price. In addition to the purchase price already received, the consideration also includes the expected purchase price adjustment (variable purchase price component) as well as the purchase price retention held in escrow. On July 10, 2026, the first partial payment of €3,056 thousand was made from the escrow account to Brockhaus Technologies.

The final purchase price adjustment has not yet been determined as of the reporting date. Some of the financial information on Bikeleasing Group that is relevant for determining the purchase price adjustment is still preliminary. Brockhaus Technologies has taken this information into account in determining the fair value of the resulting variable purchase price component. In doing so, the assumptions and values used to determine working capital in particular were adjusted due to deviations from historical comparison periods. Based on the information available as of the reporting date, the variable purchase price component was recognized as a liability with a fair

value of €2,511 thousand. The final purchase price adjustment may differ from this amount. Based on currently available information, a deviation of up to 2% from the preliminary purchase price received, less the variable purchase price component, is possible.

The gain on the sale of the Bikeleasing Group, as well as the Bikeleasing Group's income and expenses up to the date of deconsolidation, are reported separately in the consolidated statement of comprehensive income as income from discontinued operations.

The assets and liabilities of the Bikeleasing Group were derecognized in the consolidated balance sheet in the course of the deconsolidation as of June 30, 2026. The balance sheet amounts as of the prior-period reporting date are presented consistent with the previous presentation, in accordance with IFRS, and are not adjusted.

Change in scope of consolidation

As previously explained in the Q1 2026 Quarterly Statement, Brockhaus Technologies lost control of kvm-tec in accordance with IFRS 10, effective January 6, 2026, following the opening of insolvency proceedings for KVM-TEC Electronic GmbH (**kvm-tec**) and the appointment of an external liquidator. As a result, kvm-tec was deconsolidated at the beginning of fiscal year 2026.

The Bikeleasing Group was deconsolidated following the closing of the sale of the Bikeleasing Group on June 30, 2026. Further details on the transaction can be found in the section "Sale of the Bikeleasing Group" and in section "5. Discontinued operations".

Group results of operations

Continuing operations | In H1 2026, the Group's revenue decreased by 7.2% to €13,358 thousand (H1 2025: €14,392 thousand).

Total output amounted to €13,775 thousand in H1 2026, compared with €15,629 thousand in the comparative period. This figure includes own work capitalized of €843 thousand (H1 2025: €1,222 thousand).

Cost of materials decreased by 5.7%, from €3,614 thousand to €3,409 thousand, reflecting the lower revenue compared with the prior-year period.

Personnel expenses decreased significantly by €2,163 thousand from €9,131 thousand to €6,968 thousand. Other operating expenses also decreased, from €7,995 thousand to €4,396 thousand. The lower personnel and other operating expenses were primarily the result of comprehensive measures to reduce fixed costs that had already been initiated in the Security Technologies segment in Q3 2025. Other operating expenses include the €49 thousand loss resulting from the deconsolidation of kvm-tec.

Adjusted EBITDA for the continuing operations was €-548 thousand (H1 2025: €-1,694 thousand).

Depreciation, amortization, and impairment losses relating to property, plant, and equipment, and intangible assets, as well as assets identified in the course of initial consolidation (PPA assets), consist exclusively of depreciation and amortization charges. Depreciation and amortization of property, plant and equipment, and intangible assets amounted to €856 thousand (H1 2025: €994 thousand), and depreciation and amortization of PPA assets amounted to €2,451 thousand (H1 2025: €2,672 thousand).

Finance costs rose from €1,122 thousand to €1,382 thousand, whereas finance income decreased from €389 thousand to €197 thousand.

Income from income taxes amounted to €228 thousand in H1 2026 (H1 2025: €502 thousand).

In the reporting period, earnings from continuing operations before taxes amounted to € -5,290 thousand (H1 2025: € -9,283 thousand). After taxes, in the reporting period earnings from continuing operations amounted to € -5,062 thousand (H1 2025: € -8,781 thousand).

Discontinued operations | In H1 2026, revenue increased by 26.3% to €123,069 thousand (H1 2025: €97,469 thousand). Reflecting the positive revenue performance, gross profit also grew significantly, by 26.6% to €74,301 thousand (H1 2025: €58,667 thousand). The gross profit margin remained at a consistently high level of 60.4% (H1 2025: 60.2%).

Personnel expenses rose from €17,176 thousand to €19,054 thousand, whereas other operating expenses declined from €18,092 thousand to €15,805 thousand.

Adjusted EBITDA for discontinued operations amounted to €41,339 thousand (H1 2025: €26,791 thousand).

Based on the current estimate, the sale of the Bikeleasing Group generated a gain after taxes of €104,658 thousand.

Including the disposal gain, income from discontinued operations for the reporting period amounted to €125,977 thousand, which was significantly higher than in the comparative period (H1 2025: €3,052 thousand).

Results of operations of the reportable segment

For this Half-Year Financial Report, Brockhaus Technologies' segment reporting comprises the Security Technologies segment. With the signature of the purchase agreement on December 23, 2025, and the sale of the Bikeleasing Group, the former HR Benefit & Mobility Platform segment is no longer a reportable segment. The segment disclosures of the comparative period have been adjusted accordingly. The assets and liabilities of the discontinued operation in the comparative period are presented in the reconciliation.

	Reportable segment					
	Security Technologies		Central Functions and consolidation		Group	
€ thousand	H1 2026	H1 2025	H1 2026	H1 2025	H1 2026	H1 2025
Revenue	13,358	14,392	-	(0)	13,358	14,392
Revenue growth	(7.2%)		-		(7.2%)	
Gross profit	10,082	11,804	284	211	10,366	12,015
Gross profit margin	75.5%	82.0%			77.6%	83.5%
Adjusted EBITDA	1,982	1,494	(2,530)	(3,188)	(548)	(1,694)
Adjusted EBITDA margin	14.8%	10.4%			(4.1%)	(11.8%)
Adjusted EBIT	1,242	598	(2,646)	(3,284)	(1,404)	(2,687)
Adjusted EBIT margin	9.3%	4.2%			(10.5%)	(18.7%)

Security Technologies

At €13,358 thousand, revenue in the Security Technologies segment (**IHSE**) in the reporting period was below the level of the comparative period (H1 2025: €14,392 thousand). In this context, revenue in EMEA amounted to €10,491 thousand, above the level of the comparative period (H1 2025: €8,425 thousand). The main reason for this was major projects in the first half of the year. Revenue in the APAC region was €1,067 thousand, likewise up year-on-year (H1 2025: €797 thousand). There was a marked investment restraint in the Americas region due to US tariff policy and the war in the Middle East. Therefore, revenue in this region significantly declined year-on-year to €1,801 thousand (H1 2025: €5,170 thousand).

Gross profit was €10,082 thousand (H1 2025: €11,804 thousand) and the gross profit margin was 75.5% (H1 2025: 82.0%). In this context, own work capitalized during the reporting period amounted to €843 thousand and was lower than the comparative period (H1 2025: €1,222 thousand). Excluding own work capitalized, the segment's gross profit margin of 69.2% was also below the comparative period (H1 2025: 73.5%). This is attributable to the product and customer mix in the first half of the year.

Despite the significantly lower gross profit, at €1,982 thousand, adjusted EBITDA was higher than the €1,494 thousand reported for the comparative period. This is mainly due to lower fixed costs in the area of personnel and other operating expenses. In this context, management already initiated comprehensive measures to reduce fixed costs in Q3 2025.

Adjusted EBIT was €1,242 thousand (H1 2025: €598 thousand).

Central Functions

(not a reportable segment under IFRS)

Expenses in the Central Functions were below the level of the comparative period. This is primarily attributable to lower personnel expenses.

Net assets

Compared to December 31, 2025, total assets decreased from €563,239 thousand to €356,698 thousand, and were split between 19.6% (December 31, 2025: 12.8%) non-current and 80.4% (December 31, 2025: 87.2%) current assets as of the reporting date.

Non-current assets amounted to €70,085 thousand (December 31, 2025: €71,849 thousand) and consist of intangible assets and goodwill totaling €63,316 thousand (December 31, 2025: €65,045 thousand). These mainly comprise the PPA assets and goodwill of IHSE. In addition, property, plant, and equipment of €5,297 thousand (December 31, 2025: €5,868 thousand), other financial assets amounting to €509 thousand, which consist exclusively of the long-term escrowed purchase price from the sale of the Bikeleasing Group, and deferred tax assets of €962 thousand (December 31, 2025: €936 thousand) are included in non-current assets.

Current assets decreased from €491,389 thousand as of December 31, 2025, to €286,613 thousand as of the reporting date. The decrease is primarily attributable to the disposal of the Bikeleasing Group's assets classified as held for sale as of December 31, 2025, and amounting to €465,223 thousand, which were deconsolidated when the transaction closed. As of the reporting date, current assets include in particular cash and cash equivalents of €269,336 thousand (December 31, 2025: €10,171 thousand), trade receivables of €4,146 thousand (December 31, 2025: €4,251 thousand), inventories of €5,951 thousand (December 31, 2025: €7,641 thousand) and other financial assets of €6,712 thousand (December 31, 2025: €3,813 thousand). The increase in cash and cash equivalents is primarily attributable to the preliminary purchase price received on June 30, 2026, from the sale of the Bikeleasing Group. The increase in other financial assets is primarily attributable to the portion of the escrow amount, which was paid in July 2026, amounting to €3,056 thousand.

Financial position

The Group's cash and cash equivalents as per June 30, 2026 amounted to €269,336 thousand (December 31, 2025: €10,171 thousand). Due to the high level of cash and cash equivalents, the Group for the first time reported net assets of €243,025 thousand as of the reporting date (December 31, 2025: net debt of €48,119 thousand). Due to the net assets, the **leverage** KPI – defined as the ratio of net debt to adjusted EBITDA for the last twelve months (**LTM**) – is not applicable as of the reporting date. The shift from net debt as of December 31, 2025, to net assets as of June 30, 2026, resulted from the cash inflow from the sale of the Bikeleasing Group.

Calculation of net financial debt

€ thousand	June 30, 2026	Dec. 31, 2025*
Senior loans	14,130	15,257
Current account liabilities	1,257	2,611
Cash and cash equivalents**	(269,336)	(10,171)
Other financial liabilities	10,924	10,536
Net debt/(net assets) from continuing operations	**(243,025)**	**18,234**
Net debt from discontinued operations	**-**	**29,885**
Consolidated net debt/(net assets)	**(243,025)**	**48,119**
Adjusted EBITDA LTM	(1,914)	46,286
Leverage	**-**	**1.04x**

* Including discontinued operations
** Cash and cash equivalents are deducted from the loans in this presentation for purposes of analysis. There is no corresponding appropriation.

As a rule, the Group aims to achieve leverage of up to approximately 2.5x, i.e., net debt of up to approximately 2.5x adjusted EBITDA. In exceptional cases, e.g., following acquisitions, this value may be exceeded in the short to medium term. This is intended to ensure a balance between a high return, which can be achieved through a certain level of debt, and the advantages of a strong equity base.

The deferred tax liabilities of €5,941 thousand (December 31, 2025: €6,401 thousand) relate mainly to PPA assets and will be reversed through profit or loss (with no effect on cash flow) in the future as these are amortized.

Liabilities related to assets held for sale, amounting to €3,934 thousand, include outstanding obligations arising from the sale of the Bikeleasing Group, which are to be borne by the Company.

The Group's equity as of the reporting date amounted to €301,873 thousand, which was significantly higher than the level as of December 31, 2025 (€202,961 thousand). The increase is primarily attributable to the positive profit for the period resulting from the sale of the Bikeleasing Group. The equity ratio as of the reporting date was 84.6% (December 31, 2025: 36.0%).

The cash flows for continuing operations are described in the following.

Cash flow from operating activities amounted to €-1,292 thousand (H1 2025: €-5,603 thousand) or €-1,401 thousand before income taxes paid (H1 2025: €-4,058 thousand) in the reporting period and was primarily attributable to the operating cash flow surpluses of the subsidiaries.

Cash flow from investing activities amounted to €245,750 thousand (H1 2025: €-1,310 thousand). The main component was the cash inflow from the sale of subsidiaries, net of cash and cash equivalents disposed of, amounting to €246,611 thousand, which resulted from the sale of the Bikeleasing Group.

In detail, the cash inflow form the sale of Bikeleasing breaks down as follows:

€ thousand	June 30, 2026
Preliminary purchase price received	268,691
Cash and cash equivalents disposed of	(31,993)
Overdraft facilities disposed of	9,913
Sale of subsidiaries, net of cash and cash equivalents disposed of	**246,611**

Payments for capitalized development costs for the reporting period amounted to €843 thousand (H1 2025: €1,222 thousand).

Cash flow from financing activities amounted to €-6,038 thousand (H1 2025: €-3,053 thousand). The primary components are listed in the following:

- €1,000 thousand, regular repayment of the senior loan in the Security Technologies segment
- €3,795 thousand, repayment of the subordinated loan at the level of BCM Erste Beteiligungs GmbH
- €824 thousand, loan interest payments
- €419 thousand, Repayment of lease liabilities

Adjusted free cash flow before tax in the reporting period (cash flow from operating and investing activities adjusted for special compliance costs, the cost of business combinations and equity investments, the cost of acquiring/ (selling) subsidiaries, net of cash and cash equivalents, and income tax payments/(income tax refunds)) of continuing operations was €-1,851 thousand (H1 2025: €-5,369 thousand).

The following cash flows were generated for discontinued operations during the reporting period.

Cash flow from operating activities amounted to €20,121 thousand (H1 2025: €-14,999 thousand). The increase in cash flow is primarily attributable to the positive business performance in H1 2026. In addition, the previous year was significantly impacted by the seasonally high volume of business and the resulting high working capital during the summer. As a result, the refinancing backlog as of June 30, 2025, stood at a high level of €34 million in total. As of the reporting date, it stood at just €17 million, which had a significantly positive impact on cash flow in H1 2026.

Cash flow from investing activities amounted to €-3,160 thousand (H1 2025: €-2,838 thousand). It was significantly influenced by capitalized development costs of €2,297 thousand (H1 2025: €1,995 thousand) and cash outflows from the acquisition of intangible assets totaling €545 thousand (H1 2025: €288 thousand).

At €-17,341 thousand, **cash flow from financing activities** in the reporting period was above the level of the comparative period (H1 2025: €-7,143 thousand). In H1 2026, €15,000 thousand of the senior loan was repaid.

Adjusted free cash flow before tax from discontinued operations amounted to €18,670 thousand (H1 2025: €-17,332 thousand).

As a result, **adjusted free cash flow before tax** from continuing and discontinued operations amounted to €16,819 thousand (H1 2025: €-22,701 thousand).

Risks and opportunities

Changes in risks

Due to the significant inflow of funds from the sale of the Bikeleasing Group, the Group's risk-bearing capacity increased significantly and the risk situation improved accordingly.

Risk-bearing capacity is reviewed regularly as part of risk management and adjusted as needed. Due to the significant increase in risk-bearing capacity, the thresholds for the loss categories were revised compared with December 31, 2025.

Loss categories

€ thousand	June 30, 2026	Dec. 31, 2025
Very high	>=16,000	>=10,000
High	<16,000	<10,000
Moderate	<12,000	<5,000
Low	<8,000	<2,000
Insignificant	<4,000	<500

To limit banking risk, the increased liquidity resulting from the cash inflow is being specifically diversified across several credit institutions with good credit quality and low-risk interest-bearing investments. This limits the concentration risk exposure to individual institutions. The credit quality of the institutions is regularly monitored and factored into investment decisions. The banking risk assigned to the credit and counterparty default risks category is classified as very low.

Forecast

The forecast of Brockhaus Technologies for fiscal year 2026 remains unchanged. Brockhaus Technologies expects revenue of between €30 million and €32 million, and adjusted EBITDA of between €0 million and €2 million.

Disclaimer

This Half-Year Financial Report contains forward-looking statements that are based on management's current estimation of the future performance of the Group. This estimation was made on the basis of all information available as of the preparation date of this Half-Year Financial report. Forward-looking statements are subject to uncertainties – as described in the risks and opportunities section of the 2025 Combined Management Report – that are beyond the Group's control. This applies in particular to the ongoing Russian war of aggression against Ukraine, the Middle East war, China's efforts to decouple itself from the West, domestic and foreign policy uncertainties, a German economy that is close to being in recession, high energy costs, the tariff and trade policy of the US administration and the repeated US federal government shutdowns. If the assumptions made are not accurate, or if the risks or opportunities described were to materialize, actual results may differ significantly from the expected results. If the underlying information changes in such a way that a deviation from the forecast is more likely than not, Brockhaus Technologies will notify this in accordance with the statutory disclosure requirements.

Selected notes

1. Company and general information

The registered office of Brockhaus Technologies AG (**BKHT**, the **Company** or the **parent company**, together with its subsidiaries **Brockhaus Technologies** or the **Group**) is Nextower, Thurn-und-Taxis-Platz 6, 60313 Frankfurt am Main, Germany, and the Company is registered in the commercial register at the Local Court in Frankfurt am Main under commercial register number HRB 109637.

These condensed interim consolidated financial statements relate to the period January 1, 2026, through June 30, 2026 (the **reporting period** or **H1 2026**). The **reporting date** is June 30, 2026. Additionally, comparative information is presented for the period from January 1, 2025, to June 30, 2025 (**comparative period**), and for December 31, 2025, as the **prior-year reporting date**.

The consolidated interim financial statements are presented in euros, which is the Company's functional currency. The amounts disclosed are therefore rounded to the nearest euro (**€**), thousands of euros (**€ thousand**) or millions of euros (**€ million**) in line with standard commercial practice. Due to this rounding method, the individual amounts reported do not always add up precisely to the totals presented. Negative amounts are presented in parentheses and zero amounts are denoted as dashes (**-**).

2. Accounting policies

The 2025 Consolidated Financial Statements were prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the EU. IFRS comprise the effective International Accounting Standards (IAS), International Financial Reporting Standards (IFRS), the Interpretations issued by the IFRS Interpretations Committee (IFRS SIC), and the International Financial Reporting Interpretations Committee (IFRIC). These condensed Interim Consolidated Financial Statements were prepared in accordance with IAS 34.

The same accounting principles and calculation methods were used in these Interim Consolidated Financial Statements as in the last consolidated financial statements. Please refer to pages 44 et seq. of the 2025 Annual Report for information on the accounting policies applied.

3. Alternative performance measures

Adjusted alternative performance measures

4. Discontinued operations

On December 23, 2025, Brockhaus Technologies sold its entire interest in BLS Beteiligungs GmbH (Bikeleasing Group), held indirectly through BCM Erste Beteiligungs GmbH (BCM), to DECATHLON PULSE SAS (DECATHLON), a company of the French DECATHLON Group.

The sale closed on June 30, 2026. The shares and voting rights held by BCM were transferred to DECATHLON at the time of closing. Since that time, Brockhaus Technologies no longer exercises control over the Bikeleasing Group within the meaning of IFRS 10. The Bikeleasing Group was therefore deconsolidated as of the closing date.

Brockhaus Technologies received the preliminary purchase price of €269 million on June 30, 2026. The final purchase price remains subject to the purchase price adjustment mechanism agreed in the sale agreement (closing accounts concept), especially with regard to the contractually defined financial liabilities and the Bikeleasing Group's net working capital.

The Group recognized the consideration on the basis of the information available as of the reporting date and the best estimate of the final purchase price. In addition to the purchase price already received, the consideration also includes the expected purchase price adjustment (variable purchase price component) as well as the purchase price retention held in escrow.

The final purchase price adjustment has not yet been determined as of the reporting date. Some of the financial information on Bikeleasing Group that is relevant for determining the purchase price adjustment is still preliminary. Brockhaus Technologies has taken this information into account in determining the fair value of the resulting variable purchase price component. In doing so, the assumptions and values used to determine working capital in particular were adjusted due to deviations from historical comparison periods. Based on the information available as of the reporting date, the variable purchase price component was recognized as a liability with a fair value of €2,511 thousand. The final purchase price adjustment may differ from this amount. Based on currently available information, a deviation of up to 2% from the preliminary purchase price received, less the variable purchase price component, is possible.

The gain on the sale of the Bikeleasing Group, as well as the Bikeleasing Group's income and expenses up to the date of deconsolidation, are reported separately in the consolidated statement of comprehensive income as income from discontinued operations.

The assets and liabilities of the Bikeleasing Group were derecognized in the consolidated balance sheet as the course of the deconsolidation as of the end of June 2026. The balance sheet amounts as of the prior-period reporting date are presented consistent with the previous presentation, in accordance with IFRS, and are not adjusted.

Gain on the sale of the Bikeleasing Group

Based on the current estimate, deconsolidation of the Bikeleasing Group resulted in a gain before taxes of €106,718 thousand. The net assets of the Bikeleasing Group disposed of as of June 30, 2026, amount to €185,426 thousand. Of this amount, €163,027 thousand is attributable to BKHT's shareholders.

The consideration amounts to € 269,745 thousand and consists of the preliminary purchase price already received, the variable purchase price component, and the amount in escrow. The amount in escrow serves to secure certain warranty, indemnification, and tax exemption claims of the buyer and is a fixed, absolute amount defined in the sale agreement and is broken down into three components. Payment of the corresponding partial amounts to the seller will not be made until a specified future release date (Escrow Release Date), but no later than June 30, 2029, provided that and to the extent that corresponding claims can be excluded.

€ thousand	June 30, 2026
Preliminary purchase price received	268,691
Variable purchase price component	(2,511)
Amount in escrow	3,565
Consideration	**269,745**
Interest in the net assets of the Bikeleasing Group	(163,027)
Gain before taxes	**106,718**

Assets and liabilities disposed of in the course of deconsolidation

The carrying amounts of the assets and liabilities disposed of as of June 30, 2026, are presented in the following table.

€ thousand	June 30, 2026	Dec. 31, 2025
Property, plant and equipment	13,168	11,453

10. Carrying amounts and fair values of financial instruments

Classification and fair values

The table below shows the carrying amounts and fair values of financial assets and financial liabilities, including their level in the fair value hierarchy. It does not contain information on the fair value of financial assets and financial liabilities that are not measured at fair value if the carrying amount represents an appropriate approximation of the fair value.

Financial instruments measured at fair value are classified into the following three levels in accordance with IFRS 13:

- Level 1: Use of quoted prices in active markets for identical assets or liabilities
- Level 2: Use of inputs that are observable in the market either directly or indirectly
- Level 3: Use of inputs that are essentially not based on observable market data

Financial instruments measured at fair value through profit and loss

Type	Valuation technique and inputs
Escrowed purchase price	Fair value is based on the expected value of the probability of payment of the amount in escrow, discounted to its present value as of the reporting date
Variable purchase price component	Fair value is based on the preliminary purchase price adjustment calculated using the closing accounts mechanism
Contingent consideration	Discounted cash flows: The scenario-based valuation model takes account of the present value of the expected payments, discounted using the weighted average cost of capital (WACC) of the subject of the valuation.
Success fee liability Bikeleasing	The fair value is based on the preliminary purchase price from the sale of the Bikeleasing Group.

Financial instruments measured at amortized cost

Type	Valuation technique
Financial liability	Discounted cash flows: The measurement model takes account of the present value of the expected payments, discounted using the Group-specific current interest rate.

Carrying amounts and fair values as of June 30, 2026

Interest	(462)	(881)
Amortization	-	-
Net profit or loss	**(462)**	**(881)**

The following table shows the net profits and losses from financial assets and liabilities measured at fair value through profit or loss.

€ thousand	H1 2026	H1 2025
Financial liabilities		
Net profit or loss from contingent consideration	-	-
Success fee liability Bikeleasing	(845)	(64)
Net profit or loss	**(845)**	**(64)**

11. Disclosures on the consolidated statement of cash flows

The cash flow from investing activities primarily consists of the cash inflow from the sale of subsidiaries amounting to €246,611 thousand, which resulted from the sale of the Bikeleasing Group. It breaks down as follows:

€ thousand	June 30, 2026
Preliminary purchase price received	268,691
Cash and cash equivalents disposed of	(31,993)
Overdraft facilities disposed of	9,913
Sale of subsidiaries, net of cash and cash equivalents disposed of	**246,611**

12. Related party transactions

Related parties within the meaning of IAS 24 are the key management personnel. In the Group, these are the members of the Executive Board and Supervisory Board.

Executive Board members hold positions in other entities in which they are able to control or significantly influence the financial and business policies of those entities. These entities are related parties of the Group within the meaning of IAS 24.

Executive Board remuneration

Short-term bonus claims amounting to €363 thousand (H1 2025: €0 thousand) were paid out to the members of the Executive Board in the reporting period.

In connection with the closing of the sale of the Bikeleasing Group, an Investment Performance Incentive (IPI) amounting to €3,025 thousand was granted to the members of the Executive Board as of June 30, 2026. The amount granted corresponds to the maximum amount of 250% of the annual basic remuneration stipulated in the remuneration system.

€1,210 thousand of this amount (100% of the basic remuneration) will be paid out in cash in the short term. The remaining amount of €1,815 thousand will be due in the following fiscal year. In accordance with the remuneration system, any amount exceeding 100% of the basic remuneration may be granted, in whole or in part, in the form of shares. Any amount exceeding 200% of the basic remuneration will be granted in the form of shares. If shares are allocated, a lock-up period of up to four years from the date of allocation may be stipulated.

13. Contingent liabilities

Current and non-current assets have been assigned as security and land charges are in place as collateral for bank loans.

14. Events after the reporting date

Under a purchase and assignment agreement dated July 2, 2026, the remaining minority shareholders (co-investors) sold and assigned to BCM all of their shareholdings in BCM Erste Beteiligungs GmbH (BCM), along with all associated rights and obligations, including the right to undistributed profits for the current fiscal year.

In addition, Brockhaus Technologies AG acquired the shares in BCM previously held by BT Zweite Beteiligungs GmbH.

The first partial payment of €3,056 thousand was made to Brockhaus Technologies from the escrow account on July 10, 2026.

On June 29, 2026, the Executive Board of Brockhaus Technologies AG resolved to retire 499,971 treasury shares acquired by the Company, thereby reducing its share capital by €499,971. The retirement of the shares became effective in accordance with sections 237 and 238 of the *Aktiengesetz* (German Stock Corporation Act – AktG) following entry of the capital reduction in the commercial register on July 22, 2026.

Responsibility statement

To the best of our knowledge and in accordance with the applicable reporting principles for half-yearly financial reporting, the Interim Consolidated Financial Statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the Group and the Interim Group Management Report includes a fair review of the development and performance of the business and the position of the Group, together with a description of the material opportunities and risks associated with the expected development of the Group for the remainder of the fiscal year.

Frankfurt am Main, August 13, 2026

Financial calendar

August 19, 2026	Annual General Meeting 2026
November 12, 2026	Quarterly Statement 9M 2026

Basis of reporting

This Half-Year Financial Report should be read in conjunction with the 2025 Consolidated Financial Statements and the 2025 Combined Management Report and the information contained therein. Those documents are available in the 2025 Annual Report, which can be found in the Investor Relations section on our website www.brockhaus-technologies.com.

The reporting entity is Brockhaus Technologies AG (**BKHT** or the **Company**, together with its consolidated subsidiaries **Brockhaus Technologies** or the **Group**). The **reporting period** for this Half-Year Financial Report is the period January 1, 2026, to June 30, 2026. The **reporting date** is June 30, 2026. In addition, comparative information is provided for the period from January 1, 2025, to June 30, 2025 (**comparative period**).

This report has been translated from German into English. In the case of any discrepancies between the two language versions, the German version takes precedence.

Rounding

The metrics appearing in this report have been rounded in line with standard commercial practice. This rounding method does not necessarily preserve totals, so that it is possible that the amounts in this report do not add up precisely to the total presented.

Note within the meaning of the equal treatment act

Equal treatment is important to us. Only for reasons of better legibility, the use of male, female or language forms of other genders is avoided. All personal references apply to all genders unless otherwise specified.
